

Partner Workforce Timekeeper Learning Path

Below you will find a listing of the required and recommended courses that you should complete in order to gain a thorough understanding of the operation and configuration of Workforce Timekeeper. The first section of courses outlines those that are REQUIRED. The second section of courses are optional but recommended to provide insight into some of the additional Workforce Timekeeper components that are not covered in the main courses.

Required Courses

(Should be taken in the order provided)

Workforce Central, Using the Application

This course will provide you with a basic understanding of how to use Workforce Central. You will learn the core concepts for managing time and labor information using Workforce Timekeeper, as well as how to use Workforce Timekeeper tools to effectively and efficiently perform daily and periodic tasks. The knowledge gained in this course is essential to maintain employee timecards and basic schedules.
